AKTHER V N

AI Application Developer | Generative AI & Full-Stack Projects | Healthcare Documentation QA

Kerala, India | +91 9074666413 | akthernaimudheen0@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer Engineering diploma graduate combining technical foundations in full-stack web development with hands-on professional experience in AI documentation quality assurance, clinical schema validation, and OCR pipelines. Demonstrated ability building full-stack applications with TypeScript, React, Next.js, and integrating generative AI API pipelines with structured validation and testing.

CORE TECHNICAL SKILLS

Frontend & Web: TypeScript, JavaScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Web Performance
Backend & Cloud: Node.js, Firebase (Firestore, Auth, Rules), REST APIs, Supabase / PostgreSQL, Git, CI/CD, Vercel Edge
AI & LLM Systems: Generative AI APIs (Gemini, OpenAI), Prompt Engineering, Structured JSON Extraction, Deepgram TTS, Vision QA
Quality & Testing: Schema Validation, Unit & Regression Testing, OCR Validation, Clinical Documentation Standards, Adversarial QA

TECHNICAL PROJECTS

iScribe AI Architecture - Clinical Documentation Pipeline [React, TypeScript, Firebase, LLM APIs]
- Architected a multi-stage clinical documentation pipeline converting consultation audio into structured medical records.
- Integrated speech-to-text APIs with timestamped audio segmentation; engineered prompt templates extracting clinical entities into normalized JSON schemas (symptoms, medications, dosages, vitals).
- Built validation rules handling clinical negation ('denies chest pain') and uncertainty, backed by synthetic adversarial regression test cases.

RShorts / PromptToShort - AI Video Generation Pipeline [Python, FastAPI, Deepgram, Vision QA, FFmpeg]
- Engineered an automated video transformation pipeline segmenting narrative transcripts into structured 9:16 short-form video clips.
- Integrated Deepgram speech synthesis with word-level timestamp alignment for precise subtitle synchronization.
- Built candidate b-roll retrieval and ranking across stock providers, verified with automated test suites (160+ passing tests).

Frontend Systems Architecture & Technical Lab [React, TypeScript, Next.js, Tailwind CSS, Vercel]
- Engineered responsive web applications and component systems with accessible navigation, keyboard compliance, and WebP asset delivery.
- Built self-directed prototypes exploring Next.js App Router boundaries, Firebase authentication, and edge security headers.

PROFESSIONAL EXPERIENCE

Digital Marketing Intern - Orestes Technology, Infopark, Kochi — 2026 - Present
- Developed responsive web interfaces, landing pages, and component structures adhering to mobile-first standards.
- Implemented technical on-page SEO, structured metadata, and performance optimization for web systems.
- Coordinated digital campaign analytics and reporting across multi-channel client accounts.

Medical Documentation Specialist - Wisedocs — Dec 2023 - Mar 2024
- Executed high-precision quality verification of OCR-extracted medical and legal records within a distributed processing pipeline.
- Maintained high accuracy benchmarks under strict turnaround times, identifying data discrepancies and optical recognition errors.

Quality Documentation Specialist - Ritesource Infosystems LLP - DeepScribe AI Project — Nov 2022 - Nov 2023
- Audited and validated AI-generated clinical documentation for factual accuracy, terminology precision, and clinical schema compliance.
- Conducted structured quality reviews across high-volume medical documentation workflows, identifying speech-to-text failure modes.

EDUCATION & CERTIFICATIONS

Diploma in Computer Engineering | Maharajas Technological Institute, Thrissur — 2018 - 2021
Certified Program in Medical Scribing | Luminis School of Medical Scribing, Thrissur — 2022
Digital Marketing Certification | InterSmart EduTech, Ernakulam — 2026
